### DETAILED ACTION

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bockle et al. (U.S. Patent # 6,826,059 B2) in combination with Kawakami (U.S. patent # 4,618,812) and Shirai (U.S. patent # 5,598,068).

Bockle et al. disclose the claimed invention a battery operated LED lighting apparatus (figure 1-2), including a light emitting diodes (figure 1, item D1 and D2 and column 4, line 50-55). However Bockle et al. does not disclose the utilization of the technique for a battery outputting battery voltage. Kawakami teaches the similar technique for a battery outputting battery voltage and boost regulating circuit (figure 1 and column 1, line 50-55). It would have been obvious one having an ordinary skill in the art at the time the invention made to modify Bockle et al.'s LED drive circuit by utilizing the technique taught by Kawakami for the purpose increasing conversion efficiency.

In regards to claims 2-9, Bockle et al. in combination with Kawakami and Shirai disclose the claimed subject matters such as "light emitting diode comprises a plurality of group, LED connected in series, the ballasting device is a resistor (Shirai's figure 3), a buck or step-down voltage (Kawakami's figure 1), constant current (Bockle et al.' s column 2, line 40-45).
